# JavaScript Fundamentals: Introduction and Variable Declaration

1 source

This lecture material from Rungta International Skills University provides a foundational introduction to JavaScript as a vital tool for creating interactive web content. The text outlines how this scripting language works alongside HTML and CSS, detailing its history and its diverse real-life applications in e-commerce and mobile app development. A significant portion of the content focuses on variable declaration, specifically comparing the technical differences between the var, let, and const keywords. Additionally, the source explains the three primary methods for embedding code into a webpage: inline, internal, and external scripts. To reinforce these concepts, the document includes practical coding examples, naming conventions, and interactive student exercises. This comprehensive overview serves as a technical roadmap for beginners starting their journey in web development fundamentals.
